Personal Statement

Hi, I'm Güngör Öztürk. **I have been studying front-end development on websites and mobile applications.** The reason I work in these fields is that I like to develop platforms that can solve people's daily life problems. If you want to know more about me you can visit my website.

Education

Konya Technical University - **BSc Computer Engineering** / 2018 - 2022

Linux Winter Camp - **Flutter Basics** / 2020

Work Experience

Intern Software Developer - Inovaktif Engineering - Energy / 07.2022 - 08.2022

Working on redesigning and developing the company's website.

Intern Front-end Developer - ICS Defense / 07.2021 - 11.2021

Contributed to the development of the mobile application that shows the electric cars charging stations to the users.

Part-Time Software Developer - Konya Technical University Information Technologies Department / 11.2019 - 03.2020

Contributed to the mobile application project developed for the university as a front-end developer.

Freelance Web Developer / 06.2019 - Ongoing

Designed and developed responsive websites for several companies in different sectors.

Digital Skills

Front-End Development

Javascript | Next.js | Vue.js | React.js | SASS
React Native | HTML5 | CSS3 | Bootstrap

Tools

Git | VSCode | Figma | Firebase
Strapi | Airtable | Vercel | Heroku

Projects

Anamnesis Tools

I developed a website and mobile application for the digitalization of the anamnesis process in hospitals for my graduation project. (Vue.js | React Native | Firebase)

Betikblog (www.betikblog.com)

I created a blog website project where we periodically share what we learned with my friends. As part of this project, we also started creating Youtube content. (Next.js)
